

HOW TO READ THIS BOOK — THE 7-DAY PLAN (today = Mon 5 Oct, exam = Mon 12 Oct)

The book is built so that ONE pass with drills beats three passive re-reads. Follow this exact schedule:

Day	Morning (3–4 h)	Evening (2–3 h)	Output by night
Mon 5	00_THE_GAME + 01_SPEED_TOOLKIT (memorise fraction table + squares)	02_PERCENTAGES + 03_PNL_INTEREST (tricks+templates; drill % only)	% and P&L under 60 s/Q
Tue 6	04_RATIO_AVERAGE_AGE + 05_TIME_WORK	06_TSD + 07_NUMBERS_SIMPLIFICATION	arithmetic core covered
Wed 7	08_GEOMETRY + 09_MENSURATION_TRIG	10_STATISTICS_PROBABILITY + 11_DATA_INTERPRETATION	full AMC block covered
Thu 8	12_SYLLOGISM_BINARY + 13_BLOOD_CLOCKS_CALENDARS	14_PUZZLES_SEATING + 15_READING_COMPREHENSION	Logical block covered
Fri 9	16_MENTAL_REASONING (all families)	REDO all drills you scored <70% on	all blocks covered once
Sat 10	FULL MOCK #1 (100 Q / 120 min, strict) → analyse	Patch weakest 2 modules + FULL MOCK #2	two timed data points
Sun 11	Light: speed toolkit + TRAPS sections only + PYQ re-look (4 shift papers)	Rest by 9 pm; logistics check (Aadhaar unlock, letter print)	peak state

Rules that make the 7 days work:

1. Every module: read UNDERSTAND once → learn THE TRICK → work templates on paper → drill with a timer. Passive re-reading is banned.
2. Drill scoring: count net (correct – wrong/3) like the real exam. Sub-70% on any drill → redo it next morning before new material.
3. Mocks on Sat/Sun use real conditions: 120 min, no phone, OMR-style marking on the answer grid, then a 30-min autopsy (which trap ate marks?).
4. Anything you cannot solve in drill time twice in a row: write its TRICK on a single "weapon card" page. Final 30 min before sleep on Sun = weapon cards only.
5. Total daily load: 5–7 h. More is counterproductive 7 days out; accuracy lives in a rested brain.
